Dr. Novak, teaching at Cornell University, created concept mapping in 1960s.]

Learning Environments

Learning Environments Research. Established 1998, Kluwer Academic Publishers.

Learning Environments Research is an international journal in which original academic papers dealing with the study of learning environments are published. The scope of the journal is deliberately very broad in terms of both substance and methods. *Learning environment* refers to the social, physical, psychological and pedagogical contexts in which learning occurs and which affect student achievement and attitudes. The journal has an affiliation with the American Educational Research Association's Special Interest Group on the Study of Learning Environments(AERA website: <http://www.aera.net>).
