

About me:

- Emergency MD
- Working in Meded for since 1990s
- Royal College & University of Ottawa
- Special focus: **CBME**
- Founder of the International CBME Collaborators
- Worldwide collaborations
- Coach ice hockey

This Session:

HPE → CBME Movement → Definitions & Elements → Examples

Social media friendly: #meded

@drjfrank

### Current HPE?

- Time spent, not ability
- Trainees unprepared
- Unclear progression of expertise
- Weak assessment / failure to fail
- Assessment can feel bogus or useless
- Concerns about supervision & patient safety
- Missing content
- Disempowered learners
- Overwhelmed teachers
- Lack of best practice in education

Variations in MD Practice

Levitt K. Am Heart J 2014

**Outcome-Based Evaluation of Medical Education**  
 David A. Asch, MD, MPH, Sean Nicholson, MD, Jonathan S. Mirvis, MD, MChE, Mark Harris, PhD, and Andrew J. Epstein, PhD, MPH

**Abstract**  
 The goal of medical education is the production of a sufficient number of competent physicians to meet the needs of patients and populations, but it is hard to see in your back yard. That makes it difficult to measure. We propose a framework for measuring whether educational efforts produce doctors who have good care of patients.

The authors argue that the evaluation of medical education can be made more practical because they see these two issues, and they are convinced that they affect outcomes in important questions across the pathway to clinical competence. Dr. HPE will be difficult to measure, but we believe that it is possible to measure whether educational efforts produce doctors who have good care of patients.

The authors argue that the evaluation of medical education can be made more practical because they see these two issues, and they are convinced that they affect outcomes in important questions across the pathway to clinical competence. Dr. HPE will be difficult to measure, but we believe that it is possible to measure whether educational efforts produce doctors who have good care of patients.

Variable outcomes...

### Current HPE?

Time spent, not ability = Variable outcomes

What do we mean by the "CBME Era"?

Quiz: Origins of "CBME"?

Teacher Education?	Engineering?
Medicine?	Nursing?
Astronaut training?	Submarine training?
1910?	2000?
1930?	1999?

1978!

CBME = Competency Based Medical Education

Competency-based Education:

“What are the abilities needed of graduates?”

14

### CBME principles

1. Focus on outcomes: graduate abilities
2. Ensure progression of competence
3. Time is a resource, not framework
4. Promote learner centredness
5. Greater transparency & utility

...Ultimately, a move to CBME is about a **better way to train health professionals...**

Figure 2. Spectrum of skills acquisition (Dreyfus & Dreyfus 1980).

Figure 3. General curve of skills acquisition reproduced from ten Cate (2010).

	 <b>FIXED MINDSET</b> <small>Belief that my intelligence, personality and character are carved in stone; my potential is determined at birth.</small>	 <b>GROWTH MINDSET</b> <small>Belief that my intelligence, personality and character can be developed! A person's true potential is unknown (and unknowable).</small>
<b>DEGREE</b>	Look smart in every situation and prove myself over and over again. Never fail!!	Stretch myself, take risks and learn. Bring on the challenges!
<b>EVALUATION OF SITUATIONS</b>	Will I succeed or fail? Will I look smart or dumb?	Will this allow me to grow? Will this help me overcome some of my challenges?
<b>DEALING WITH SETBACKS</b>	"I'm a failure" (identity) "I'm an idiot"	"I failed" (action) "I'll try harder next time"
<b>CHALLENGES</b>	Avoid challenges, get defensive or give up easily.	Embrace challenges, persist in the face of setbacks.
<b>EFFORT</b>	Why bother? It's not going to change anything.	Growth and learning require effort.
<b>CRITICISM</b>	Ignore constructive criticism.	Learn from criticism. How can I improve?
<b>VALUES OF OTHERS</b>	Feel threatened by the success of others. If you succeed, then I fail.	Finds lessons & inspiration in other people's success.
<b>RESULT...</b>	Plateau early, achieve less than my full potential.	Reach ever-higher levels of achievement.

## Is Your Program Competency-based?

How would you know??

Change is Underway...

### Competency-based Education:

What are the abilities needed of graduates...?

...an outcomes-based approach to the design, implementation, assessment and evaluation of an education program using an organizing framework of competencies

CBME Defined:

Van Melle's  
Core  
Components  
of CBME

1. Outcomes competency framework
2. Sequenced progression of competence
3. Tailored learning experiences
4. Tailored bedside coaching & observation
5. Programmatic assessment

(publication pending)

The CBME  
"Toolkit"

**Competency / Competencies**

An observable ability of a health professional

- Reflects a spectrum

- Integrates multiple components such as knowledge, skills, values, & attitudes
- Multiple competencies can be combined
- Measureable with respect to a defined outcome

© 2009 Royal College and The International CBME Collaborators

Milestones in Medical Education: Progression

28

**Milestones:**

- The abilities expected of a health professional at a stage of development

**Entrustable Professional Activities (EPAs):**

- The key tasks of a discipline that a practitioner needs to be able to perform
- (e.g. run a clinic)

**Problems Milestones Solve**

- Progression of Competence
- Comprehensive Curriculum
- Faculty guidance
- Learner transparency
- Failure to fail

**Defining Milestones & EPAs**

## Key Concept in EPAs: *Entrustment*

- "What can I safely delegate with indirect supervision?"

31

## Examples of EPAs

- In the real world:
- Teenager on an errand

- In medicine:
- Run a code

## 1. Outcomes Defined as Competencies

- Carefully chosen abilities for those who successfully complete the curriculum
- Observable
- Practical
- Relevant to practice expertise

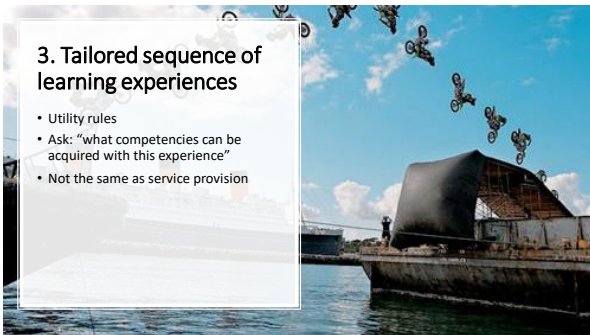

## 2. Competencies Organized as a Progression

## 3. Tailored sequence of learning experiences

- Utility rules
- Ask: "what competencies can be acquired with this experience?"
- Not the same as service provision

## 4. Competency-focused teaching methods

- Active learning
- Application
- Immersion
- Coaching & high quality feedback
- Deliberate practice

A Coaching Model for CBME

Facilitating learning and development of a learner's competence

### 5. Programmatic Assessment that Promotes Learning

- Emphasis on workplace observation
- Focused on tasks performed
- Multiple observers
- Multiple methods
- Entrustment
- Curation
- Collation
- Decision-framework & benchmarks

### Multiple Assessments

Caverzagie and Iobst

### Paradigm Shift of Thinking

**Work Based Assessment in CBME**

41

**Competence Committees**

- Responsible for regular review of learner progress
- Uses integrative data from multiples observations
- Identifies patterns and trends
- Recommends progression

42

A Spectrum of CBME Innovations

**Van Melle’s Components of a “CBME” Curriculum:**

1. Outcomes defined as **competencies**
2. Competencies organized as a **progression**
3. Tailored sequence of learning **experiences**
4. Competency-focused **teaching** methods
5. **Programmatic assessment** for learning

43

Maastricht Electronic portfolio (ePass)

Comparison between the score of the student and the average score of his/her peers.

**CBME: A Global Movement**

- Netherlands
- USA
- Singapore
- Saudi Arabia
- Kuwait
- South Africa
- Australia
- Canada
- +more

*Transformational CBME:*

*Competence by Design Project*

44

## Key Elements

- New CanMEDS
- Stages of physician development
- EPAs & Milestones
- New Assessment
- New Accreditation

Defining the stages of training

## Next Generation Meded:

### Forget:

- PGYs
- Objectives
- Prescriptive standards
- Ad hoc ITERs
- the Big Exam
- "Read more"
- 5 years only

### Enter:

- Stages
- Milestones & EPAs
- Local Flexibility
- Competence Ctes
- Progress testing
- Focused observation
- Ready to practice

## Milestones within an EPA

Typically, each EPA **integrates** multiple milestones.

## Milestones and EPAs within Four Stages of Residency

## Progression of Competence
