Goals and Overview

- Define what is meant by a "Generation"
- Review generational characteristics (in the US) prior to current generation
- Identify characteristics associated with "Millennials" as a generation
- Review specific areas of strength and concern for Millennials as learners
- Strategies for interacting with Millennial learners

"People try to put us down, Talkin' 'bout my generation..."

By the time you turned 28, what was the most important world event in your life?

Educating a New Generation Teaching Baby Boomer Faculty About Millennial Students

Karin Mangat, MS, RN, BC

The author examines the impact of generational differences on the faculty-student relationship. She identifies the key factors in the relationship and provides strategies for faculty to effectively teach and mentor millennial students. The author also discusses the importance of faculty development programs in addressing these challenges.

Multigenerational Challenges in Academic Medicine: UC Davis's Responses

Lydia Pardo Howell, MD, Gregg Servis, and Ann Bonham, PhD

Abstract

Academic medicine is a unique work environment, one of the few where members of four different generations regularly interact and where multigenerational teams are key to fulfilling its mission, particularly education. This can lead to increased creativity, but also to intergenerational conflict, since each generation has different values and expectations. The authors describe multigenerational challenges confronted at the University of California, Davis, School of Medicine, and that school's responses to them. Included issues related to load, compensation, evaluation for advancement, recruitment and retention, and attendance at required meetings. Awareness of the different generational qualities and values allowed the school of medicine to identify the multigenerational origin of many of these ongoing issues and challenges and to plan appropriate solutions within the Office of Academic Affairs. These include policy changes related to work-life balance, utilizing multiple faculty tracks with different roles, allowing part-time faculty appointments, creating a variety of faculty development programs geared toward different generational needs.

APM Perspectives

The Association of Professors of Medicine (APM) is the national organization of departments of internal medicine at the US medical schools. APM's official teaching mission is to improve the internal medicine curriculum. The APM's official journal is The Professor Journal of Medicine, the association invites authors to publish manuscripts on issues concerning academic internal medicine.

For the most information about departments of internal medicine, please visit APM's website at www.apm.org

The Millennial Muddle

How stereotyping students became a thriving industry and a bundle of contradictions

By Eric Hoover

What defines a “generation”

- Entire body of individuals who are born and living at about the same time
- Groups of individuals who because of shared age, experiences, and environment, also share attitudes, values, ideas, styles, and challenges
- Distinction from prior and future groups of individuals

Silent or Veteran's Generation (1922-1945)

- Respect, service & loyalty
- “Traditional” roles
- Respect the system, work for security
- Strong heroes
- Defined by Great Depression & WWII
- Reward “job well done”

Baby Boomers (1946-1964)

- Social & political change
- Evolving gender/race roles
- Parallel lives of work and home
- “Live to work”
- Vietnam, civil rights & women's liberation
- Rewards: money, title, & recognition

“Everybody's getting together after work to do some more work—you in?”

www.newyorker.com

Generation X (1965-1980)

- Progressive ideas & cynicism
- Varied gender/race roles requiring decisions about "balance and priorities"
- Respect expertise, work to have a "killer life"
- Dual-career families and "latch-key kids"
- Personal computer revolution
- Rewards: freedom and time

"But you can't miss her second-grade first-semester graduation!"

www.newyorker.com

Millennial Generation (1981-2001)

- Also known as Generation Y, the Net Generation, and Generation Me
- Inquisitive, interested in equality
- Aware of community, but with strong importance of self and individual
- Sense of "post"-race / gender roles
- Significant social upheaval (9-11, wars)
- Financial instability (scandals, recession)
- Disappointment from leaders and "heroes"
- Technology assumed and omnipresent (Internet, cell phones there from childhood)

How can we optimize Millennials' learning?

- How do they appear to prefer to interact?
- What motivates these learners?
- How do they measure success?
- What will be successful mentoring strategies?
- How can we leverage what makes them tick?

Differences in motives between Millennial and Generation X medical students

Nicole J Borges,¹ R. Stephen Mammel,² Carol L. Elam³ & Bonnie J Jones⁴

Medical Education 2009; 44: 573-576

Characteristics of Millennials as learners

- Well-structured, scheduled environments
- Computer-based, game-oriented
- Engagement in communities and through social networking
- Learning opportunities that can be fulfilled 24-7

Beth Israel Deaconess Medical Center

How can we better teach Millennials?

- Learners today need help with
 - Context
 - Prioritization
 - Understanding
 - Interpretation

Generational changes and their impact in the classroom: teaching Generation Me

Jean M Twenge

Medical Education 2009; 43: 398-405

High scores: Assertiveness, self-liking, narcissistic traits, high expectations, stress, anxiety
Lower scores: Self-reliance

How can we better teach Millennials?

- Learners today need help with
 - Context
 - Prioritization
 - Understanding
 - Interpretation
- Can be overwhelmed by information
- Looking for the "bottom line"
- Relevance must be emphasized
- Offer opportunities to collaborate & learn as team
- Reinforce downsides to multi-tasking
- Discuss "digital professionalism"

Beth Israel Deaconess Medical Center

A teaching hospital of Harvard Medical School

What principles should we keep in mind when teaching Millennials?

- Learning demands engagement
- Active or "experiential" interactions
- Content is important, but delivery is key
- Explicit discussion of expectations and "norms"
- Rapidly accessible feedback is the norm
- Integrate education technology into interactions when at all possible

Technology enhances teaching and learning during medical training

Are there downsides to technology in medical training?

Growing Up Digital, Wired for Distraction

Students have always faced distractions and time-wasters. But computers and cellphones, and the constant stream of stimuli they offer, pose a profound new challenge to focusing and learning.

Divided Attention

In an age of classroom multitasking, scholars probe the nature of learning and memory

Alex Williamson for The Chronicle Review

Enlarge Photo

You're drinking coffee and talking to your boss on a cellphone, practicing your pitch. You cause an identical accident. You've heard all the warnings about cellphones and driving—but on a gut level, this wreck might bewilder you in a way that the first scenario didn't. Wasn't I operating at peak alertness just then? Your brain had been aroused to perform several tasks, and you had an illusory sense that you must be performing them well.

By David Glenn

Imagine that driving across town, you've fallen into a reverie, meditating on lost loves or calculating your next tax payments. You're so distracted that you rear-end the car in front of you at 10 miles an hour. You probably think: Damn. My fault. My mind just wasn't there.

By contrast, imagine that you drive across town in a state of mild exhilaration, multitasking on your way to a sales meeting.

Attitudes and Perceptions of Internal Medicine Residents Regarding Pulmonary and Critical Care Subspecialty Training*

Scott Lorin, MD, John Heffner, MD, FCCP, and Shannon Carson, MD

(CHEST 2003; 127:630-636)

vs 3.31 ± 0.86 , $p = 0.03$ [mean \pm SD]. The five most commonly cited attributes of PCCM fellowship that would attract residents to the field included intellectual stimulation (69%) opportunities to manage critically ill patients (51%), application of complex physiologic principle (45%), number of procedures performed (31%), and academically challenging rounds (29%). The five most commonly cited attributes of PCCM that would dissuade residents from the field included overly demanding responsibilities with lack of leisure time (54%), ~~SD~~ poor match of career with resident personality (24%), and treatment of pulmonary diseases (16%).
